

[Troubleshooting] How to check if the AB Tasty tag is installed on my website?

To check if the AB Tasty tag is installed on your website, you can use one of the following tools:

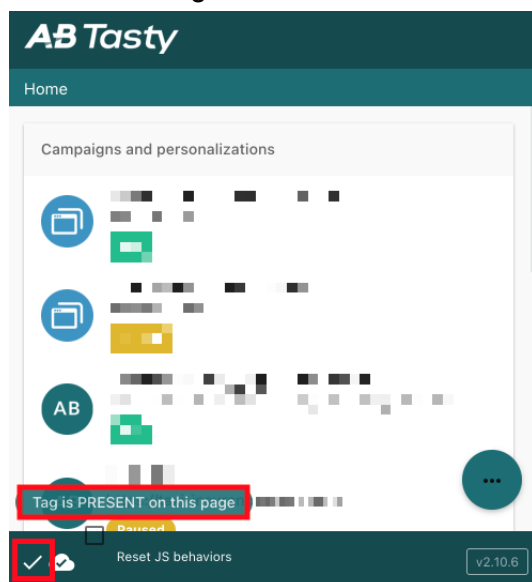

1. [The AB Tasty Chrome extension](#)
 2. [The console](#)
 3. [The source code](#)
-

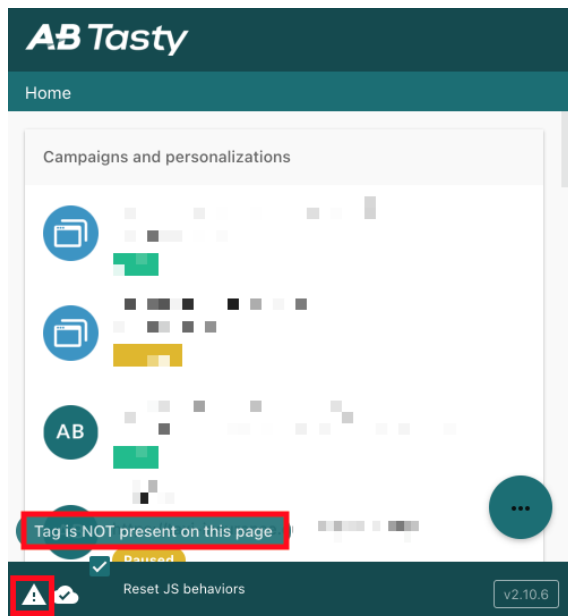

Using the AB Tasty Chrome extension

In your Chrome browser, you can install and use the [AB Tasty extension](#).

Once installed, the AB Tasty plugin icon appears on your toolbar.

On your website, if you click on the AB Tasty plugin icon, you will have information about whether the tag is installed or not.

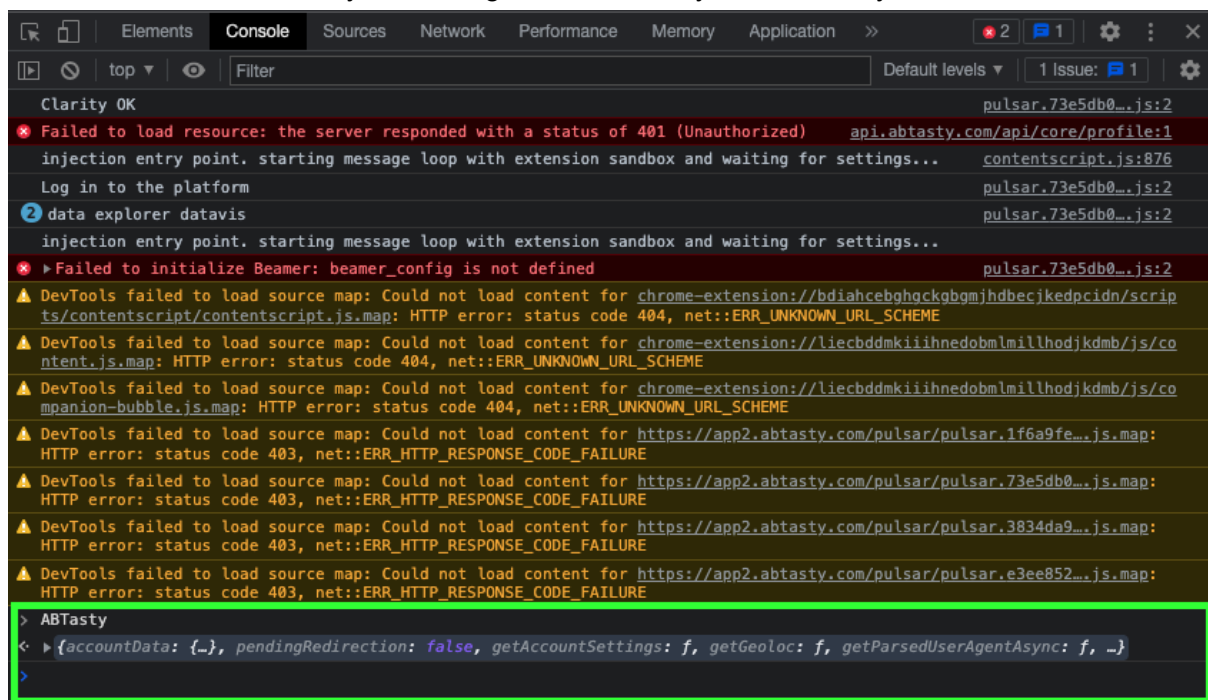

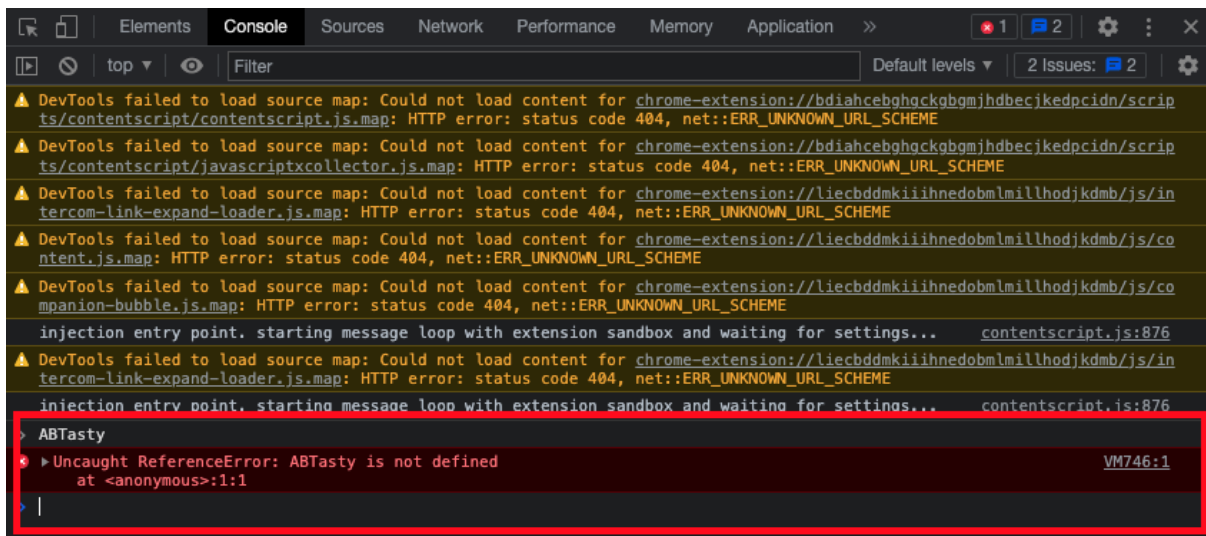

Using the console

To check if your tag is installed on your website using the console:

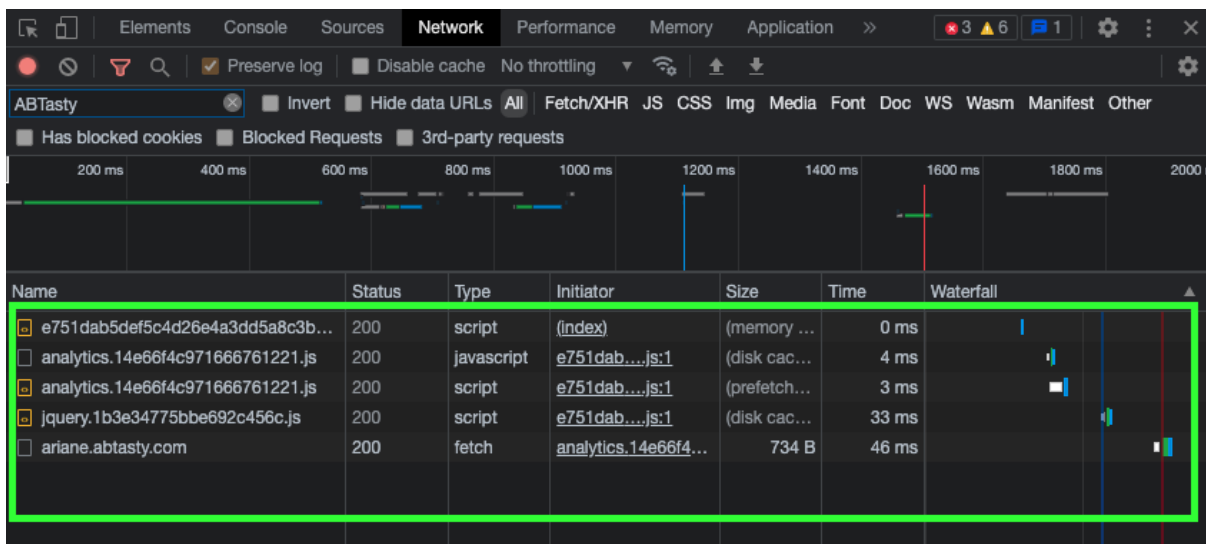

1. Go to your website and type F12 or right click > inspect.
2. Go to the “Console” tab : it opens the console.
3. Search for “ABTasty”. If the tag is installed on your website, you will see this line:

If the tag isn't installed, you will have an error:

You can also type “ABTasty” in the “Network” tab. If the tag is installed, you will see those lines:

If the tag isn't installed, you won't see anything.

Using the source code

To check if your tag is installed on your website using the source code:

1. From any page of your website, press Ctrl+U or right clicking > inspect.
2. Go to the “Elements” tab.
3. From the search bar or by pressing CTRL+F, search for try.abtasty (this is the format the tag will always have).

If the tag isn't installed you won't find any result.
