

How to check if AB Tasty's tag is installed on my website ?

To check if AB Tasty's tag is installed on your website, you have different possibilities:

Open the console

Go to your website and type F12 : it will open the console. Look for "ABTasty". If the tag is installed on your website, you'll see those lines :

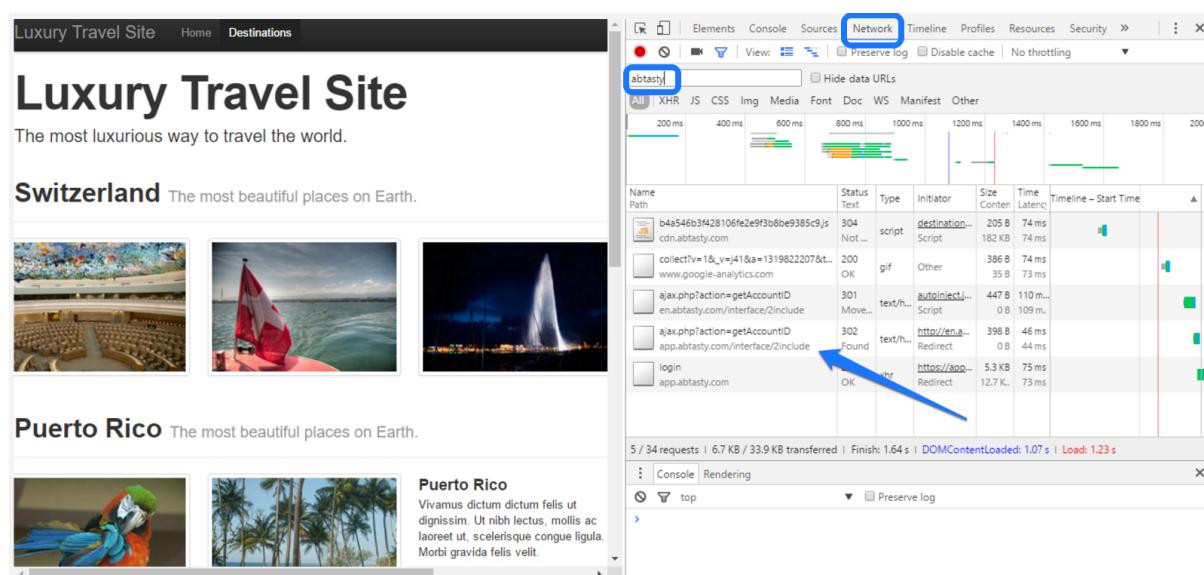

The screenshot shows a browser developer tools window with the "Console" tab selected. The page content is a travel website featuring a church and mountains. The console output shows the following:

```
Failed to load resource: the server responded with a status of 404 (Not Found)
> ABTasty
< function (){function R(D,A,B){function C(){window["targetingCallbackFor_ "+M]=function(A,B,C,F){return function(){setTimeout(function(){N.p(A,B,C,F,I);var E=variations[X.c(A[B],ABTastyTests)];E!== -3&&E...}}}}}};
```

If the tag isn't installed, you'll read 'undefined'.

In the console again, you can type "ABTasty" in the "Network" section. If the tag is installed, you will see those lines :

The screenshot shows a browser developer tools window with the "Network" tab selected. The search bar contains "abtasty". The table lists network requests, and one entry for "login" from "app.abtasty.com/interface/include" has a status of "Found" and is highlighted with a blue arrow pointing to it.

Name	Status	Type	Initiator	Size	Time	Timeline – Start Time
b4a546b3428106fe2e9f3b08be9385c.js	304	Not ...	destination	205 B	74 ms	
cdn.abtasty.com	200	Script	Script	182 KB	74 ms	
collect?v=1&y=41&a=1319822207&t=	200	OK	Other	386 B	74 ms	
www.google-analytics.com	301	text/...	autoetect	35 B	73 ms	
ajax.php?action=getAccountID	301	text/...	Move...	447 B	110 ms	
en.abtasty.com/interface/include	302	text/...	http://en...	0 B	109 ms	
ajax.php?action=getAccountID	302	text/...	http://en...	396 B	46 ms	
app.abtasty.com/interface/include	Found	Redirect	http://app...	0 B	44 ms	
login	200	OK	http://app...	5.3 KB	75 ms	
app.abtasty.com	12.7 K.	Redirect	http://app...	12.7 K.	73 ms	

If the tag isn't installed, you won't see any lines.

Open the source code

On your website's page, you can open the source code by typing Ctrl+U.

Ctrl+F to find "abtasty" → 1 of 3

```
<html class=" lang.dir" dir="ltr" lang="fr-FR">
<head>
    <!-- Tag Commander -->
    <script type="text/javascript">
        tc_vars = {};
    </script>
    <script type="text/javascript" src="https://cdn.tagcommander.com/1638/tc_header.js"></script>
    <!-- // Tag Commander -->
    <!-- Tag ABTasty -->
    <script type="text/javascript" src="//try.abtasty.com/ec780a2f41d91afb4efe00c823a7996b.js"></script>
    <!-- // Tag ABTasty -->
```

We can observe that the tag is here

Use Chrome plugins

In your Chrome browser, you can install AB Tasty and Ghostery plugins.

- Install and use AB Tasty extension

Checkout

<https://chrome.google.com/webstore/detail/abtasty/bigoemfnjgidfijehdgillncneklifgb>

Once installed, the AB Tasty plugin icon will appear on your toolbar.

On your website, if you click on the AB Tasty plugin icon, you will have information about whether the tag is installed or not.

A screenshot of a website titled 'Luxury Travel Site'. The page features sections for 'Switzerland' and 'Puerto Rico', each with images and descriptions. A blue toolbar icon for 'AB Tasty' is visible in the top right corner. A tooltip window from the plugin is shown, stating 'Confirmation that the tag is on the page' and 'AB Tasty script found on this page ✓'. Below this, it says 'Last script update was 3 Days ago ...'. The URL in the address bar is 'abtastylab.com/b4a546b3f428106fe2e9f3b8be9385c9/destinations.php#'.
